

Job Title – Software Engineer – Generative AI

Logixal is an application software services company specializing in eCommerce, eBanking, CRM, Artificial Intelligence, Machine Learning, TensorFlow and Large Language Model (LLM) Domains. We provide omni channel solutions for Retail, Luxury Goods, Financial Services, Media, Publishing, Telecom and Subscription Model based businesses. We are Partners in Excellence with enterprises seeking to enhance and transform their business models. Our focused investments in solution accelerators and evolving technologies help achieve superior business outcomes. The experience and proven capabilities of our talented team of over 100 professionals enables them to exceed customer expectations.

Our customers, spread across the United States, Europe, Middle East, Africa and Asia, are supported from our Offices in India, UK and the USA. In the last 10+ years, we have a 100% track record of successfully extending and implementing product software for various enterprises. Logixal is known to deliver superior total cost of ownership (TCO) in Re-platforming / Upgrades as well as Greenfield implementation projects.

Software Engineer - Generative AI:

Software Engineer - Gen AI Developer role will be part of Digital Commerce Team building AI-powered applications and solutions using GENAI based Solutions. This role will Analyse, Design, Develop, and deploy Ecommerce applications using GEN AI based models like OpenApi, Claude, Grok, ElevenLabs, Perplexity, Google Gemini. The role involves working with LLMs, AI frameworks, and modern backend technologies to build intelligent automation and AI-driven features. This role will collaborate closely with data scientists, engineers, and product managers to create innovative AI-driven products and services.

Responsibilities:

- Design, develop, and deploy Gen AI based scalable applications on **Python** platform
- Worked extensively on deploying custom LLM using **OpenAI / Gemini / Perplexity / ElevenLabs / Claude / Ollama & Grok**.
- Work with deep learning frameworks such as **TensorFlow, PyTorch, and Scikit-learn** or **Keras**
- Optimize and Finetune AI models for performance, scalability, and real-time processing.
- Develop **APIs and Microservices** for enabling AI models with front-end applications.
- Work with cloud platforms (**AWS, Azure, or GCP**) to deploy AI applications at scale.
- Preprocess & manage large datasets for AI training & inference.
- Implement data pipelines to streamline AI workflows.
- Ensure AI models are updated and continuously improved based on new data.
- Track AI model performance and implement improvements based on feedback.
- Address technical challenges such as model drift, bias, and explainability.

Qualification and Experience:

- Minimum 2 years of experience in Generative AI based App Development
- Proficiency in **Python**, or **JavaScript** for AI application development
- Should have Working experience with Gen AI - **OpenAI / Gemini / Perplexity / Claude / Ollama & Grok**
- Should have experience in **ML Ops** for deployment
- Exp in cloud services (**AWS, GCP, Azure**) for AI model deployment & DB Tech (**NoSQL, PostgreSQL, MongoDB**)
- Understanding of **DevOps, CI/CD** pipelines, and containerization (Docker, Kubernetes)
- Experience in **eCommerce / Digital Commerce / Digital Banking** experience is preferred
- Bachelor's and Master's (preferred) in Computer Science with Strong communication skills.
- Behavioural Skills - Excellent Verbal/Written Communication skills in the English Language, Influence/Impact on decision making, Customer Orientation, Team Leading skills, Solution-oriented Leadership skills, Visionary mind-set.

Location: Mumbai / Bengaluru
